

International Journal of Chemical Technology

International Journal of Chemical Technology is dedicated to publish vital information relating scientific discoveries and inventions in chemical technology to their conversion into commercial products.

Scope: Chemical engineering, catalysis, leather processing, new methods of polymerization, membrane separation, optically active drugs and synthetic agrochemicals, chemical reaction engineering, biochemical engineering, Petroleum technology, corrosion metallurgy and applied chemistry.

Submit your most significant and interesting research findings for publication in *International Journal of Chemical Technology* via online submission system at <http://scialert.com>.
