

Asian Journal of Nematology

Asian Journal of Nematology is a peer-reviewed international scientific journal dedicated to publish original research and reviews on basic, applied, descriptive or experimental nematology.

Scope: Basic and applied nematology, including nematode biosystematics, host-parasite relationships, physiology, ecology, novel molecular tools, biochemical, biological control, integrated nematode control of plant parasitic nematodes. Besides plant parasitic nematodes, the journal also welcomes the manuscripts on free-living, predaceous, bacteriophagous, and entomopathogenic nematodes.

Submit your most significant and interesting research findings for publication in *Asian Journal of Nematology* via online submission system at <http://scialert.com>.
